Education

Oregon State University — Corvallis, OR
Bachelor of Science in Computer Science, Minor in Business — *Sept. 2023 – June 2027*

- President, Product Management Club @ OSU
- Vice President, Cuban Salsa Club @ OSU

Experience

Product Manager Intern — June 2026 – Sept. 2026
IBM - Compiler Technologies — *New York, NY*

- Led end-to-end consumability testing for IBM COBOL Elevate in a z/OS mainframe environment, partnering cross-functionally with Product and Engineering to evaluate installation, configuration, and core workflows against a 3-hour time-to-value target ($\leq$2 hours setup; $\leq$1 hour first successful use case) and identify barriers to adoption.
- Tested IBM COBOL Elevate's AI-assisted code remediation workflow on z/OS, evaluating how developers identify, understand, and resolve compiler migration issues and translating usability gaps into actionable recommendations for Design and UX teams.
- Developed the competitive landscape for IBM COBOL Elevate by evaluating 13 enterprise modernization solutions and translating technical differentiators into a seller-ready resource for go-to-market strategy and product positioning.

President and Founder — June 2025 – Present
Product Management Club @ Oregon State University — *Corvallis, OR*

- Founded Oregon State's first Product Management Club, growing a cross-functional community of 40+ active members through industry partnerships and strategic programming.
- Led a client-facing product initiative for a local business, managing user research, PRDs, and execution to deliver a scalable employee handbook platform on schedule.
- Organized 11+ workshops and speaker events on product strategy, user research, and Agile, engaging 150+ students and generating 30K+ online impressions.

HCI Research Lab Intern — Sept. 2023 – May 2025
Oregon State University — *Corvallis, OR*

- Conducted qualitative and quantitative research on AI and traditional software systems, analyzing algorithmic bias, usability, and demographic disparities to inform inclusive product and design insights.
- Designed and executed user studies (surveys, interviews, cognitive walkthroughs) with 100+ participants, synthesizing insights into personas, usability findings, and prioritized recommendations aligned with visual design principles.
- Co-authored 2 peer-reviewed HCI publications, cited 7 times, demonstrating impact in algorithmic bias, inclusive design, and human-centered software evaluation.

Projects

Adaptive AI Code Assistant for COBOL Modernization | *RAG, LLMs, Python*

- Leading a year-long capstone team developing an adaptive AI code assistant for COBOL modernization, using RAG and cognitive learning style adaptation to improve legacy code comprehension and developer onboarding.
- Defining product requirements, system architecture, and evaluation criteria while leading a cross-functional team through the development of an industry-advised proof of concept.

Personal Finance Microservices Application | *JavaScript, HTML/CSS, Python, Flask, Render, Vercel*

- Built and deployed a personal finance application using a microservices architecture, integrating APIs and frontend state across services.

Skills

Programming & Development: JavaScript, Python, C++, C, x86 Assembly, SQL, HTML, CSS, AI/ML, Git
Product & Project Management: Jira, Asana, Figma, Notion, Excel, Agile methodologies, User Research
Coursework & Certifications: Operating Systems, Data Structures, Algorithms, Web Development, Databases
